### DETAILED ACTION

1. This Office action is responsive to the application filed 08/26/2003.
2. Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application.

The examiner requests, in response to this Office action, any documentation known to qualify as prior art under 35 U.S.C. sections 102 or 103 with respect to the invention as defined by the independent(s) claims. That is, any prior art (including any documentation used to develop the disclosed/claimed subject matter, background art and any products for sale) similar to the claimed invention that could reasonably be used in a 102 or 103 rejection. Specifically, the examiner is looking for saving a program such that execution of the program is allowed to continue in the event of an error (program runaway).

This request does not require a search. Support for this request is derived from 37 CFR 1.56 and 1.105, however, it is not intended to interfere with or go beyond that **required** under 37 CFR 1.56 or 1.105.

The request may be fulfilled by asking the attorney(s) of record handling prosecution and the inventor(s)/assignee for references qualifying as prior art. A simple statement that the query has been made and no prior art found is sufficient to fulfill the request. Otherwise, the fee and certification requirements of 37 CFR section 1.97 are waived for those documents submitted in reply to this request. This waiver extends only to those documents within the scope of this

Art Unit: 2185

request that are included in the applicant's first complete communication responding to this requirement. Any supplemental replies subsequent to the first communication responding to this request and any information disclosures beyond the scope of this request are subject to the fee and certification requirements of 37 CFR section 1.97.

In the event documentation (e.g. newly submitted/previously submitted on an IDS, incorporated by reference or "common knowledge" generally found in the background section but not a publication) is determined to qualify as prior art, a discussion of relevant passages, figs. etc. with respect to the claims must be provided. That is, for each **independent** claim limitation identify a corresponding prior art element by page, line and/or fig. Since applicant is most knowledgeable of the present invention and submitted art, a discussion of the reference(s) with respect to the instant claims is essential.

In the present disclosure, the Background section identifies a prior art device. In response to this Office action, the examiner requests a discussion of which, if any, independent claim features correspond to prior art elements in the background documentation. Since applicant is most knowledgeable of the present invention and the background art, a discussion of the background art with respect to the instant claims is essential. That is, for each claim limitation identify a corresponding prior art element by page, line, and/or fig.

This Office action has an attached requirement for information under 37 CFR 1.105. A complete reply to this Office action must include a complete reply to the attached requirement for information. The time period for reply to the attached requirement coincides with the time period for reply to this Office action.

Art Unit: 2185

3. Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119. The certified copy has been received.

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
